

Thursday, June 11th, 2009

9:00am- 12:00pm

Please join us for a free workshop! Topics covered will include:

- xThe importance of soil erosion control
- xRegulations and permits that govern work near water
- xSamples of soil erosion control materials
- xDescriptions of materials plus when and how they should be used
- xDesigning and planting greenbelts

@Y U f b \ c k \ g c] \ \ Y f c g] c b \ Wc b h f c \ \ WU b \ V Y Wc a Y
a project. This workshop is designed to inform participants of the regulations and permits regarding soil erosion plus materials and techniques that you can use to control it. There are a variety of erosion control materials available that offer many advantages over simply installing silt fencing. Learn more so you can provide an expanded service for customers. The workshop will be a combination of indoor instruction at the MI DEC Gaylord office followed by outdoor instruction at the Five Lakes Natural Area.

Please RSVP by June 8th if you are interested in attending by calling the Otsego Conservation District at (989) 732-4021.

This workshop is being coordinated by the Otsego Conservation District with support from USDA Natural Resources Conservation Service, Huron Pines and Michigan Department of Environmental Quality.

*This workshop was made possible
by a generous grant from
Michigan Erosion Sedimentation Control Agents
(MESCA).*
